

Components for plant engineering

With more than 55 years' experience in metalworking, we are able to develop, design and manufacture precision customised vessels, components and solutions.

For existing systems, components can be overhauled to restore functionality.

Our Variants

Components for plant engineering	
Weight	up to 150t
Diameter	up to 5.000mm
Wall thickness	up to 235mm
Connections	Standard & custom connections
Materials	Carbon steels, austenitic steels, nickel-based steels, duplex steels, clad steels

- ✓ Spare parts
- ✓ Manholes
- ✓ Handholes
- ✓ Jacket shots
- ✓ Seals
- ✓ Conical heads
- ✓ and more!

Your Advantages

Certified

We are certified to national and international standards

Tailor-made solution

The custom component is designed and manufactured to meet your exact requirements

Decades of experience

For more than 55 years, our name has stood for expertise and quality in metalworking

Global leader

STABO is one of the world's leading manufacturers of high pressure components
